REMARKS: IMC 2517 (Watts Bar Unit 2 Construction Inspection Program) is issued to provide the policies and requirements for the Watts Bar Unit 2 (WBN Unit 2) construction inspection program during that unit's resumption of construction after an approximately 20 year suspension of construction activities.

IP 30703 (Management Meetings - Entrance and Exit Interviews) is being reissued and reactivated as a part of the 10 CFR Part 50 construction inspection program to support the resumption of construction activities at Watts Bar Unit 2. The inspection of construction activities at Watts Bar Unit 2, following restart of construction in 2007, will be governed by Inspection Manual Chapter 2517, "Watts Bar Unit 2 Construction Inspection Program."

IP 71003 (Post-Approval Site Inspection For License Renewal) has been revised to address the concern that the previous inspection procedure, as written, was too broad and that it did not focus on the needed inspection activities.

DISTRIBUTION: Standard
