Subject: Whittaker Final Status Survey Plan

Jim and Marjorie:

As we discussed on-site last week, I am working on the Whittaker site Final Status Survey Plan (FSSP) to address the subsurface soils in the excavated areas, the excavated soils (for backfill), surface soils in unexcavated areas, and slag piles with concentrations < DCGLs (for backfill). Since there is no approved D Plan at this stage, does the NRC want to review and approve the FSSP? Perhaps we just need to have a meeting to discuss the approach and come to an agreement. I expect, that we will be pulling some soil samples from the bottom of the excavations before a final FSSP is in place. I have maps of sample points already prepared.

Any word on the license amendment?
