

April 8, 2008

APPLICANT: Entergy Operations, Inc. (Entergy)

FACILITY: Grand Gulf Unit 3

SUBJECT: SUMMARY OF MARCH 19, 2008 MEETING REGARDING THE GRAND GULF
COMBINED LICENSE APPLICATION

On March 19, 2008, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 1 public meeting at NRC Headquarters, 11545 Rockville Pike, Rockville, Maryland, with representatives of Entergy Operations, Inc. (Entergy). The purpose of the meeting was to address the technical content of the recently-tendered Grand Gulf Unit 3 combined license (COL) application. The meeting agenda is provided as Enclosure 1 and attendees are identified in Enclosure 2.

This meeting summary and the associated meeting notice are available through the Agencywide Documents Access and Management System (ADAMS) as a package at Accession Number ML080910157. ADAMS is the system that provides text and image files of NRC's public documents. Documents are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. If you do not have access to ADAMS or have problems accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) staff at 1-800-397-4209, 301-415-4737, or pdr@nrc.gov.

This public meeting was a follow-on meeting to the meeting held on March 6, 2008, at NRC Headquarters. The March 6, 2008, meeting (ML080720687) provided the initial opportunity for Entergy to familiarize the staff with the overall structure and format of the Grand Gulf Unit 3 COL application. This follow-on meeting, scheduled approximately two weeks after the COL application was made available to the staff, provided the opportunity for Entergy to discuss the technical content of the COL application and to address issues identified by the staff. The meeting focused on the content of the final safety analysis report (FSAR) and environmental report (ER).

The meeting consisted of technical presentations by Entergy representatives on most of the chapters of the FSAR and ER and interactive question/answer discussions with the staff on various technical issues. For each chapter or topical area, a separate session was conducted with participation by Entergy subject-matter experts and appropriate NRC staff. The focus of each session was to address technical questions and comments identified by the staff during the initial review of the application. Presentation materials for this meeting consisted of excerpts from the FSAR and ER and are available in ADAMS at Accession Number ML080910173.

At the meeting's conclusion, there was general agreement among the staff that the sessions had been informative and provided assistance for the staff's COL application acceptance review. Additional meetings may be held on specific COL application issues.
