DAC Process Options

- Option A: Resolve through Design Certification process (amendment)
  - Staff reviews design to resolve DAC
  - Tier 2 is updated to reflect the design without DAC
  - Rulemaking is performed to certify amended design
- Option B: Resolve before license is issued
  - Staff reviews design to resolve DAC
  - Departures submitted to reflect design without DAC
- Option C: Meet after license is issued
  - Staff inspects to verify design ITAAC met
  - Amendment submitted to reflect license without DAC

Option C: Meet DAC after COL issued

- NRC staff inspects to verify DAC met
- Licensee evaluates any resulting departures from DCD and changes to plant-specific information in the FSAR
- If required under DCR Section VIII or under 10 CFR 50.59, licensee submits a license amendment request
- In all cases, licensee updates FSAR in accordance with 10 CFR 50.71(e) to reflect detailed design information from DAC resolution
