

October 7, 2008

APPLICANT: Exelon Nuclear Texas Holdings, LLC

FACILITY: Victoria County Station, Units 1 and 2

SUBJECT: SUMMARY OF SEPTEMBER 24, 2008 MEETING REGARDING THE VICTORIA COUNTY STATION COMBINED LICENSE APPLICATION

On September 24, 2008, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 1 public meeting at NRC Headquarters, 11545 Rockville Pike, Rockville, Maryland, with representatives of Exelon Nuclear Texas Holdings, LLC (Exelon). The purpose of the meeting was to address the technical content of the recently tendered Victoria County Station (VCS) Units 1 and 2 combined license (COL) application. The meeting agenda is provided as Enclosure 1 and attendees are identified in Enclosure 2.

This meeting summary and the associated meeting notice are available through the Agencywide Documents Access and Management System (ADAMS) as a package at Accession Number ML082690129. ADAMS is the system that provides text and image files of NRC's public documents. Documents are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. If you do not have access to ADAMS or have problems accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) staff at 1-800-397-4209, 301-415-4737, or pdr@nrc.gov.

This meeting provided the opportunity for Exelon to familiarize the staff with the overall structure and format of the VCS COL application, to discuss the technical content of the COL application, and to address issues identified by the staff. The meeting consisted of technical presentations by Exelon representatives on the application and interactive question/answer discussions with the staff on various technical issues. Presentation materials for the meeting are Enclosures to this meeting summary and are in ADAMS at Accession Numbers: ML082690125, ML082690124 and ML082690123. Four public breakout sessions were held on the following topics: the environmental report, emergency planning, Chapter 2 – Site Characteristics, and the departure for toxic gas. The focus of each session was to address technical questions and comments identified by the staff during the initial review of the application. Exelon provided necessary subject-matter experts to discuss the topics with the NRC staff.

The meeting concluded in the individual breakout sessions and there was general agreement among the staff that the sessions had been informative and provided assistance for the staff's COL application acceptance review. Additional meetings may be held on specific COL application issues as needed.

-2-

Members of the public attended this meeting and no public meeting feedback forms were received. Please direct any inquires to me at 301-415-4045 or Mark.Tonacci@nrc.gov.
