**SUBJECT:** COMANCHE PEAK NUCLEAR POWER PLANT, UNITS 3 AND 4  
DOCKET NUMBERS 52-034 AND 52-035  
COMBINED LICENSE APPLICATION UPDATE TRACKING REPORT, REV. 0

Dear Sir:

Luminant Generation Company LLC (Luminant) hereby submits the Combined License application (COLA) Update Tracking Report, Rev. 0 for Comanche Peak Nuclear Power Plant Units 3 and 4. The changed pages in the report result from editorial corrections, errata corrections, and acceptance review question resolutions as further described below.

The Update Tracking Report provides a method to collect changed pages from the COLA and periodically submit them to the NRC. The objective is to provide marked-up pages to the reviewers as soon as reasonable so they do not have to wait for the next COLA revision. The Update Tracking Report will also be used to submit pages changed as a result of an environmental review site audit or safety review site visit.

The Update Tracking Report will generally be separated into four sections:

- Editorial changes/errata for the Final Safety Analysis Report (FSAR)
- Technical changes or updated information for the FSAR
- Editorial changes/errata for the Environmental Report (ER)
- Technical changes or updated information for the ER

It is Luminant's intention to submit COLA pages changed by responses to RAIs along with the RAI responses. Those changed pages would not be repeated in the next Update Tracking Report revision. Occasionally, it might not be practicable to prepare the changed COLA pages in time to be submitted with the RAI response. In such a case, the COLA pages changed by RAI responses would be submitted to the NRC in the next Update Tracking Report revision.

DO90  
NRW

Each change on a COLA page in the Update Tracking Report will be indicated with a change bar and with right margin notation as the NRC has seen in other COLAs. There are several sources of changes to the COLA and each source has a specific notation format:

CTS-00456	Editorials/errata, COLA acceptance review issues, and commitments to the NRC made in Luminant letters are captured in the COLA Tracking System (CTS)
RCOL2_2.4.13-1	Changes in the COLA may result from responses to COLA RAIs
DCD_12.02-1	Responses to DCD RAIs may generate changes in the COLA
MAP-03-005	Changes in the DCD from drivers other than DCD RAIs may generate changes in the COLA
HYD-28	Pages changed as a result of NRC safety site visits or environmental site audits, coded with the specific information need annotation

Should you have any questions regarding these changed pages or matters relating more generally to Luminant's nuclear generation development program, please contact Don Woodlan (254-897-6887, Donald.Woodlan@luminant.com) or me.

I state under penalty of perjury that the foregoing is true and correct.

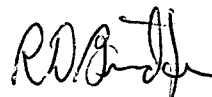

Executed on April 2, 2009.

Sincerely,

Luminant Generation Company LLC

Rafael Flores
