

**MEETING REPORT
CROW BUTTE RESOURCES, INC.**

DATE: June 30, 2009

TIME: 4:00 p.m.

PLACE: Grand Hyatt Hotel
Denver, CO 80202

PURPOSE: Discuss Current and Future Licensing Activities

ATTENDEES: See Attachment A

BACKGROUND: Crow Butte Resources, Inc. (CBR) operates an *in situ* leach (ISL) uranium recovery facility at its main Crawford, Nebraska, facility. It is seeking to expand operations to its nearby North Trend property and other sites near Crawford.

DISCUSSION:

After introductions, CBR discussed the status of its obligations regarding the renewal and requested a status update from the staff. The staff responded that it is on schedule to complete the safety evaluation report (SER) by December 2009 and the environmental review document by February 2010, as stated in its letters to the Atomic Safety Licensing Board Panel. The staff also stated that the North Trend SER is scheduled to be completed in Fall 2009 and the environmental review document will be by December 2009.

CBR stated that the Three Crow application is still scheduled to be submitted in March 2010. CBR stated that it is incorporating aspects of the previous requests for additional information (RAIs) into its application to reduce the number of future RAIs. Regarding the surety, CBR requested the status of that review. Staff responded that it is finalizing the review and should be finished with it shortly.

After the business portion of the meeting, questions were received from members of the public. Answers were provided by NRC staff and the Licensee.

ACTIONS:

None
