

Construction Inspection Assessment Process Panel

Tony Pietrangelo

Tom Houghton

Bryan Dolan

Mark McBurnett

Incorporate Most Key Features of ROP

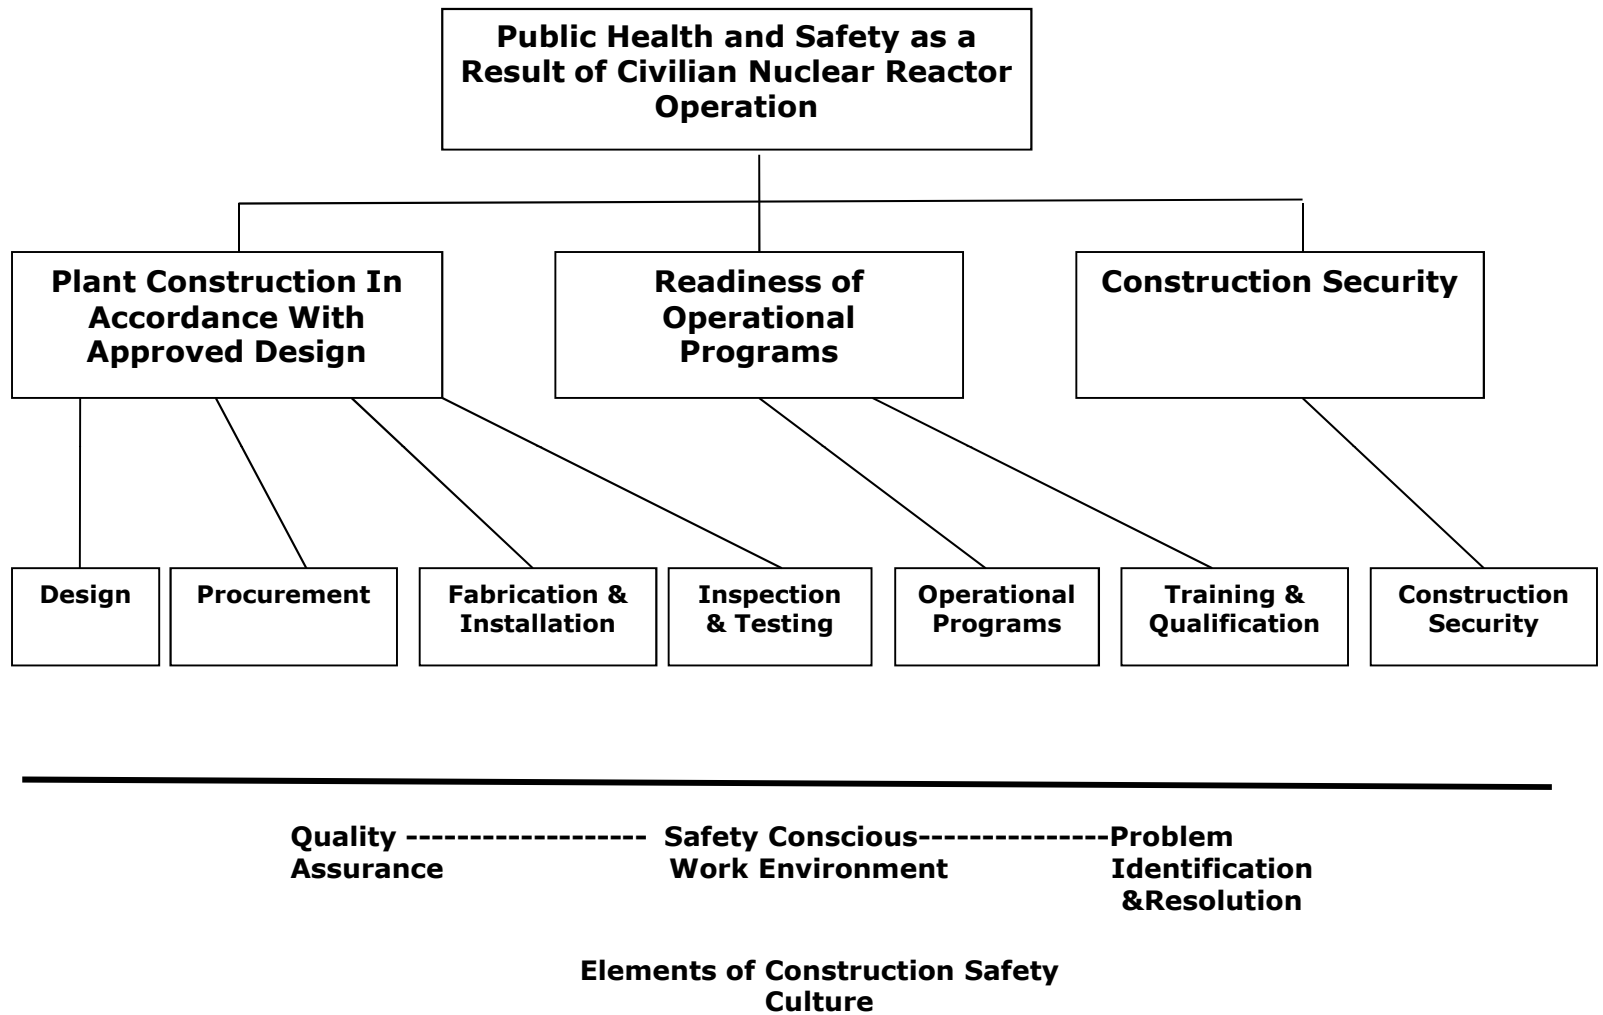

- Principles of ROP
 - Objective
 - Predictable
 - Understandable
 - Risk-Informed and Performance Based
- Transparent to stakeholders
- Cornerstones to focus resources and communication
- Significance of findings risk informed
- Graduated, focused NRC response
- However, performance indicators are not appropriate

DRAFT

**NRC's Overall
Safety
Mission**

**Strategic
Performance
Area**

Cornerstones

Development Activities

(Top Down)

- What are the objectives of CIAP, in addition to achieving the safety mission?
 - Principles
 - Communications with licensees and the public
 - NRC resource allocation
- What are the strategic performance areas?
- What are the cornerstones and cornerstone attributes?
- What are the cross-cutting issues?
- How do we determine the significance of findings?
- What does the Construction Response Table look like?
- Does the “front end” (IMC 0613) need to be revised?
- Does a table top of CIAP reveal any necessary changes?
- How is safety culture addressed?
- What changes are needed in NRC procedures to reflect the new program?
- What is the implementation plan?
- What is the communications plan?

Development Schedule

(Goal: Commission Options Paper, November 2010)
