The design, engineering, and other information contained in this document have been prepared by or on behalf of the STP Nuclear Operating Company (STPNOC) in connection with its application to the United States Nuclear Regulatory Commission (NRC) for amendment of the design certification of the ABWR nuclear plant design pursuant to Title 10, Code of Federal Regulations Part 52, Appendix A. No use of or right to copy any of this information other than by the NRC and its contractors in support of STPNOC's application is authorized.

The information provided in this document is an amendment and a subset of a much larger set of know-how, technology and intellectual property rights pertaining to standardized, modularized, nuclear powered, electric generating facilities that utilize a minimum of active components, referred to as the "ABWR STP Aircraft Impact Assessment Amendment Revision 3." Without access and a grant of rights to that larger set of know-how, technology and intellectual property rights, this document is not practically or rightfully usable by others, except by the NRC as set forth in the previous paragraph.
