REMARKS: IMC 2515 App B (Supplemental Inspection Program) has been revised to remove duplicative and contradicting guidance and refer to IMC 0305, "Operating Reactor Assessment Program," as the source for assessment guidance. Attachment 1 has been updated to reflect currently available inspection procedures; the old Attachment 2, deleted, since the information is maintained on the Web; and Attachment 3, renamed as Attachment 2.

IP 95001 (Supplemental Inspection for One or Two White Inputs in a Strategic Performance Area) has been revised to: (1) define procedure completion criteria and (2) add guidance for issuing inspection reports for held open and parallel performance indicator findings. The revision has also been reworded for clarity, and a reference section has been added.

IP 95002 (Supplemental Inspection for One Degraded Cornerstone or Any Three White Inputs in a Strategic Performance Area) has been revised to define procedure completion criteria and add a reference section.

IP 95003 (Supplemental Inspection for Repetitive Degraded Cornerstones, Multiple Degraded Cornerstones, Multiple Yellow Inputs or One Red Input) has been revised to define procedure completion criteria and add a reference section.
