Thanks Dennis. I'm going to forward your email to AECOM for their review.

Subject: FW: Impressive list for Salem

FYI:

I was looking for something else and came across this--this list is just the scientific publications that came from PSEG Salem's marsh restoration project for mitigating their intake/discharge impacts.

http://www.pseg.com/environment2008/estuary/pdf/scientific_publications.pdf

I don't think this includes any of the impact studies themselves.
