	We should talk face to face at least at the branch level.	VCX
Perhaps with need	a branch level meeting soon.

	our Review - Revised Public Meeting Notice - Seabrook ASR - January 19, 20	012
-	, ,	
Art,		
Your points are w	rell taken and sound very reasonable to me. I totally agree about the	operability being top
priority.	on taken and bearta very reaconable to me. I tetany agree about the	operating top
priority.		
I will look at a Hea	adquarters conference room for the week of February 13 – 17, 2012,	and place a hold on it, if
a public meeting i	s needed.	
Thombo		
Thanks. John		$\bigcirc$

(b)(5)	I will work with Rich Conte to come	۱ هـ د د د د د د د د التحديد و ما بالغازي و مدين
		up with key milestones to
resolve the Part 50	portion of the concrete issue at Seabrook.	

Here are my proposed next steps with Region I in the lead with support from NRR, DLR:

Interim Operablity

Information in this record was deleted

in accordance with the Freedom of Information Act, exemptions 5

FOIA- 2012-0119

- NRR complete the TIA response (12/31/11)
- Region I apply the TIA results to the existing open operability determinations to identify inadequacies or gaps in information (1/20/12)
- If no gaps or inadequacies are identified conduct a public meeting. (2/12)
- If inadequacies or gaps are identified evaluate for additional regulatory action, 50.54f letter, CAL or a reactive inspection (initiate actions by 1/31/12).
- As part of or following additional regulatory action conduct a public meeting

## Long term Operability (current license period)

- Region I apply the TIA results to the licensee's comprehensive plan including testing to ensure operability through the end of the current licensing period (12/31/11.
- If inadequacies or gaps are identified address the problems within the inspection program commensurate with the period established above for interim operability.

All information from the above should be provided to DLR for consideration and assessment of the aging management program in parallel but subordinate to reviewing operability within the current licensing period. I will give you a call in the next few days to solicit your thoughts.

Importance: High

## Gentlemen:

I found an error on the previous meeting notice agenda and fixed it. Please provide your comments <u>on or before Monday</u>, <u>December 12</u>, <u>2011</u>.

Thanks. John
