HRA Data Initiative

It is an open issue how joint (nuclear industry wide) data collection and analysis could be arranged in a meaningful way.

- Issues to be addressed in the organization of data projects
    - Proprietary rights
    - In kind contribution/Exchange
    - Format and structure, coding guideline, DC workshop provides a start
- Examples and Insight from ICDE - How to start, Initiation work shop
- Role of HRA Society

How to start, Initiation work shop

- Technical scope

- Define format for data collection
  - To be described in a General coding guideline
  - DC workshop (and its continuation)

- OECD/NEA may be a possibility
  - Proprietary rights

Role of HRA Society

- Envisioned as a coordinating role
  - OECD
  - Regulators
  - International Industry
- Helping to define
  - HRA needs

- It is an open issue how joint (nuclear industry wide) data collection and analysis could be arranged in a meaningful way.
