Re: Nine Mile Point Unit 2
Docket No. 50-410
NPF-69

Gentlemen:

Subject: PROPOSED LICENSE AMENDMENT - UPRATED OPERATION

The purpose of this letter is to provide to the Staff an attached letter from the General Electric Company. The attached letter provides clarification of the affidavit for the proposed uprated operation license amendment for Nine Mile Point Unit 2 which was provided to the Staff in our letter dated July 22, 1993 (NMP2L 1397). The General Electric Company letter discusses the non-proprietary nature of the no significant hazards consideration for the proposed uprated operation license amendment. This information is provided at the request of John Menning, Nine Mile Point Unit 2 Project Manager, NRR.

Very truly yours,

B. Ralph Sylvia
Exec. Vice President-Nuclear

SUBJECT: NMP2 POWER UPRATE REPORT RELEASE

- Reference: 1. NMP2 Power Uprate Report NEDC-31994P, Revision 1,
dated May 1993
2. Affidavit signed by David J. Robare, dated April 30, 1993

The purpose of this letter is to provide clarification regarding Enclosure 4 to the Niagara Mohawk Power Corporation letter dated July 22, 1993 (NMP2L 1397) to the NRC which submitted the General Electric Report of Reference 1. Enclosure 4 to the Niagara Mohawk letter contained the General Electric Affidavit of Reference 2.

As stated in the Reference 2 Affidavit "this document, taken as a whole, constitutes a proprietary compilation of information." Release to the public of the information in Section 11.4 of Reference 1 is not deemed competitively significant and appears necessary for NRC processing of the power uprate application. Therefore, consistent with the Affidavit, the "release" of Section 11.4 (Significant Hazards Consideration Assessment) for NRC use in processing the 10CFR50.92 application or in preparation of the SER for Nine Mile Point 2 power uprate of the Reference 1 power uprate report is acceptable to General Electric Company.

Sincerely,

David J. Robare
Plant Licensing Services Manager
