

U.S. Nuclear Regulatory Commission

Selection of FY 2022 Special Interest Function for Analysis

The U.S. Nuclear Regulatory Commission (NRC) has selected Product Service Code (PSC) D307- IT and Telecom-IT Strategy and Architecture for analysis for fiscal year (FY) 2022. NRC had a total base and all option value of \$59,026,753.93 on contracts under this PSC. D307 has been selected for further analysis for the following reasons:

- It has not appeared previously on NRC's Top 10 PSC list from last year; and
- PSC D307 was not the subject of a previous focused analysis.

NRC reviewed the Final Civilian Service Contract for Reporting Activity for Fiscal Year 2022 and anticipates that there are expired contracts on this report. This report uses the Estimated Ultimate Completion Date and does not take into consideration the actual completion date. The NRC will review the expired contracts during the Service Contract Inventory, but requests that OMB/OFPP review the report again to filter out contracts that have already expired to ensure reporting accuracy for both the contractors that are required to report as well as for government personnel who are engaged in the process.
