Subject: Notice of Intent to Pursue Subsequent License Renewal Applications

Reference 1: NRC Regulatory Issue Summary 2009-06, Revision 1, "Importance of Giving the NRC Advance Notice of Intent to Pursue License Renewal," February 26, 2024 (ML24018A240)

Dear Sir or Madam:

In Reference 1, the NRC described the importance of providing advance notice of plans for license renewal to allow the NRC staff to better plan and budget for reviews of applications submitted in accordance with Title 10 of the Code of Federal Regulations (10 CFR) Part 54, "Requirements for Renewal of Operating Licenses for Nuclear Power Plants."

Consistent with Reference 1, this letter provides advance notification that Vistra Operations Company LLC (Vistra OpCo) intends to submit two Subsequent License Renewal Applications (SLRA); one application in January to March of 2028 and one application in October to December of 2028.

Vistra OpCo is not prepared at this time to announce the specific plants for these subsequent license renewal applications and, therefore, requests that the NRC identify these plants as "Unnamed Vistra Plant."

There are no new regulatory commitments made in this submittal.

Should you have any questions, please contact Nic Boehmisch at (254) 897-5064 or nicholas.boehmisch@vistracorp.com.

Sincerely,

A handwritten signature in dark ink, appearing to read "David Kruegel".

David Kruegel
