Kevin Williams, Director
Division of Materials Safety, Security, State and Tribal Programs
Office of Nuclear Material Safety and Safeguards
United States Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Williams,

The Connecticut Department of Energy and Environmental Protection is pleased to submit its application to become an Agreement State for Nuclear Regulatory Commission (NRC) review. We appreciate the significant assistance of the NRC team which reviewed our draft application. We appreciate the comments and have incorporated revisions into the formal application.

We have posted an electronic version of Connecticut's final application for an Agreement to the file sharing account provided by the NRC. The application includes the individual components required by *Section 4.0 Information Needed and Evaluation Criteria* of SA-700 NRC *Handbook for Processing and Agreement* (June 17, 2022). In his letter to NRC Chair Hansen dated October 31, 2024 Governor Lamont provided his Certification for the application.

We look forward to working with the NRC on the completion of the process to become an Agreement State over the course of the next several months. Please do not hesitate to contact me should you require assistance.

Thank you,

Jeff Semancik
Director, Radiation
Bureau of Air Management
Connecticut Department of Energy and Environmental Protection
