

APPENDIX B

ON-SITE CONSTRUCTION REVIEW PLAN

FALLS CITY UMTRA PROJECT INSPECTION, 12-9-92

CONTACT: Woody Woodworth, DOE Site Manager
FTS 8-505-845-5725

DATE: December 9, 1992

TEAM MEMBERS & Daniel Rom, Geotechnical Engineer
ASSIGNMENTS: Michael Layton, Groundwater Hydrogeology

PURPOSE: Routine Construction Review

SCOPE:

1. Introductions
2. Brief safety indoctrination, if required
3. Observe material placement and testing
4. Observe area of wet slimes exposed on the face of the disposal cell
5. Observe area of naturally-occurring radioactive "red material"
6. Observe dust control procedures
7. Review settlement behavior of the embankment
8. Observe construction activities at Pile #3
9. Review written records
10. Conduct exit meeting

NOTE: There are no formal open issues to be resolved; however, the material placement procedures in the area of exposed slimes will be addressed.
