

Exhibit 6

**Sample Mid-Cycle or End-of-Cycle Review Meeting Agenda**

1. Summary of results from previous [Annual Assessment] or [Mid-Cycle] Letter.
2. Discussion of plant performance **[April 1,YR- December 31,YR\*] or [July 1,YR - June 30,YR]** based on safety significant inspection findings and performance indicators (PIs) in each of the following areas:

STRATEGIC PERFORMANCE AREAS AND CORNERSTONES

Reactor Safety:

- Initiating Events
- Mitigating Systems
- Barrier Integrity
- Emergency Preparedness

Radiation Safety

- Occupational Rad. Safety
- Public Radiation Safety

Safeguards

- Physical Protection

3. Discussion of adverse trends as indicated by substantive cross-cutting issues
  - a. Review any docketed correspondence or meetings conducted between **[April 1,YR- December 31,YR\*] or [July 1,YR - June 30,YR]** regarding a potential or actual safety-conscious work environment concern or issue.
  - b. Review PIM entries between **[April 1,YR- December 31,YR\*] or [July 1,YR - June 30,YR]** for indications of a human performance problem trend from identified findings.
  - c. Review PIM entries between **[April 1,YR- December 31,YR\*] or [July 1,YR - June 30,YR]** for indications of a corrective action problem trend from identified corrective action related findings.

4. Discussion of licensee and NRC action on safety significant PIs and inspection findings

- a. Discussion of the results of any follow-up actions taken by the licensee and the NRC to current safety significant PIs and inspection findings.
- b. Discussion of any planned NRC follow-up actions due to safety significant PIs and inspection findings
- c. Discussion of safety significant PIs and inspection findings that existed during the annual assessment period, but where current performance is no longer safety significant. **(End-of-Cycle Only)**

| 5. Discussion of inspections planned through ( March 31st) or ( September 30<sup>th</sup>).

6. Summary of decisions and the status of actions taken from the Action Matrix.

**Note: Other topics can be discussed during the review meetings that may not be required in accordance with this chapter, but are beneficial for the regional office to discuss at these meetings. Several potential topics include the following: (1) Outages scheduled to determine any specific outage activities to be inspected, (2) Technical needs to support scheduled Problem Identification and Resolution (IP 71152) inspections, and (3) Completion status of previously scheduled inspections since the last review meeting.**

| \* These dates apply for the current inspection/assessment transition cycle ending on 12/31/01. Beginning on  
| January 1, 2002, these dates will be [January 1, YR - December 31, YR]
