Economic Simplified Boiling-Water Reactor Design Certification (ESBWR): Supplemental Proposed Rule: 10 CFR Part 52 (RIN 3150-A185; NRC-2010-0135)

On May 6, 2014, the NRC published a supplemental proposed rule in the *Federal Register* ([79 FR 25715](#)) proposing to amend its regulations to certify ESBWR standard plant design. The proposed ESBWR design certification rule was published for public comment in the *Federal Register* on March 24, 2011 ([76 FR 16549](#)). The NRC is publishing this supplemental proposed rule to provide an opportunity for the public to comment on two matters. The first is proposed changes related to the analysis methodology supporting the ESBWR steam dryer design that were made after the close of the public comment period for the proposed ESBWR design certification rule. The second is the NRC's proposed clarification of its intent to treat 50 referenced documents within Revision 10 of the ESBWR design control document as requirements and matters resolved in subsequent licensing and enforcement actions for plants referencing the ESBWR design certification. The applicant for certification of the ESBWR design is GE-Hitachi Nuclear Energy. Comments on this supplemental proposed rule are due by June 5, 2014.
