

The following Security Advisory (SA) is not available because it is marked "Official Use Only – Security-Related Information/Safeguards Information" and is exempted from public disclosure in accordance with 10 CFR 2.390.

SA-05-01, "Safeguards Advisory For Power Reactors, Category I Fuel cycle Facilities, Independent Spent Fuel Storage Installations, Conversion Facility, and Gaseous Diffusion Plants" dated January 10, 2005

In 2005, the NRC released a statement to selected NRC and Agreement State licensees recommending that power reactors, category I fuel cycle facilities, independent spent fuel storage installations, conversion facilities, and gaseous diffusion plants maintain heightened vigilance for potential security threats in accordance with 10 CFR 73.1 and NRC Orders.

The Nuclear Regulatory Commission (NRC) has issued SA-05-01 to certain large materials licensees (NRC and agreement state) who possess, use, ship or receive high-risk radioactive materials. Note that the security advisory contains physical security information and is, therefore, being withheld from public disclosure in accordance with 10 CFR 2.390.
