

The following Security Advisory (SA) is not available because it is marked "Official Use Only – Security-Related Information" and is exempted from public disclosure in accordance with 10 CFR 2.390.

SA-2011-09, "INFORMATION SECURITY PROGRAMS"

The Nuclear Regulatory Commission (NRC) issued SA-2011-09 dated December 8, 2011, to licensees because of recently identified items with Information Security Programs that could potentially impact a licensee's ability to protect and control classified information. These items cover a range of topics to enhance a licensee's ability to control access to classified information by authorized individuals, prevent unauthorized persons from gaining access to classified information, and to prevent accidental disclosure of classified information in unclassified documents.
