TRAINING: No special training is required for any documents issued with this Change Notice.

REMARKS: IMC 2800 "Materials Inspection Program." Revision of 2800 as a result of Phase 3 of the updates to Inspection Manual Chapter 2800 Working Group efforts.

- Incorporate Very Low Safety Significance Issue Resolution Process.
- Define risk-modules.
- Update Enclosure 1 with most current list of Inspection Procedures.
- Incorporate lessons learned from the implementation of the inspection program during the COVID-19 pandemic including a new Appendix A – Inspection Program Modifications During Pandemics or Other Situations Impacting Travel to Perform Inspections, and defining hybrid, onsite, and remote inspection.
- Added a new section on 07.07 Inspections of Licensees Undergoing or Transitioning to Decommissioning.
- Additional guidance to leverage the collective effort of the National Materials Program.
- Align 2800 with data entry fields and guidance for the inspection module in the Web-based Licensing System (WBL).
- Incorporate a section for the coordination and documentation of alteration to the implementation of IMC 2800.
- Revised Enclosure 2 – Information for the Inspection of Licensees Holding Nuclear Materials Management and Safeguards System (NMMSS) Accounts, to update with current practices and information.
- Updated sections as a result of comments received on the draft guidance that was provided for comments to the regions and to the Agreement States.
- Updated guidance due to reflect or reference additional guidance issued by the program office, NMSS (reciprocity, bankruptcy, use of inspection module in WBL, etc.).
