CHANGE NOTICE 24-039

DELETED:

	<u>Number</u>	<u>Date</u>
1.	IMC 0611 App D	10/31/23
2.	IP 71111.11	12/29/21

TRANSMITTED:

	<u>Number</u>	<u>Date</u>
	IMC 0611 App D	12/06/24
	IP 71111.11	12/06/24

TRAINING: No special training is required for any documents issued with this Change Notice.

REMARKS: IMC 0611, Appendix D, "Guidance for Problem Identification and Resolution Inspection Reports." Revised to remove guidance for documenting review and closure of open CAPRs for prior supplemental inspections and replace with reference to IMC 0306 section 06.09.

IP 71111.11, "Licensed Operator Requalification Program and Licensed Operator Performance." This revision reinstated the PI&R section that was deleted in 2018 revision and expanded it to be a performance-based portion of the IP focused on in-plant operator performance. The revision allows additional flexibility for the biennial inspection team makeup, while maintaining the goal that a qualified examiner, inspector, and someone with familiarity of the reactor technology is on the inspection. Due to the elimination of the NRC's Generic Fundamentals Examination associated with NUREG-1021, Revision 12 and DPO-2021-002 (ML23059A216), guidance was added for inspectors to observe and follow-up on any potential weakness in licensed operator knowledge of generic fundamentals. This revision clarified that the standard for examination quality and administration is the facility's approved training program.
