CHANGE NOTICE 25-030

DELETED:

	<u>Number</u>	<u>Date</u>
1.	IMC 1245 App C5	06/26/20
2.	IP 87131	08/24/11
3.	TI 2800/043 Rev 4	12/22/20

TRANSMITTED:

<u>Number</u>	<u>Date</u>
IMC 1245 App C5	09/22/25

TRAINING: No special training is required for documents issued with this Change Notice.

REMARKS: IMC 1245 Appendix C5, "Non-power Production and Utilization Facility Technical Proficiency Training and Qualification Journal." This revision updated references to courses, corrected format items, and provided additional information regarding how the qualification of inspectors should be recorded. This change also addressed the training recommendation concerning safety culture that was outlined in OIG-24-A-07. Removed signature for DD on Form 1 – only BC approval is now required for proficiency credit.

IP 87131, "Nuclear Medicine Programs, Written Directive Required." This inspection procedure is deleted. A previous revision of IP 87130 combined the scope and objectives of two IPs (87130 and 87131) into one procedure. This was part of a restructuring of IPs that was recommended by the Materials Inspection Program Working Group. When the revised IP 87130 was issued on April 26, 2022, IP 87131 should have been withdrawn. Change Notice 22-008 (ML22112A137), which was issued with the revised IP 87130, references this merger.

TI 2800/043 Rev 4, "Inspection of Facilities Potentially Contaminated with Discrete Radium-226 Sources." This TI has been deleted. It is expired and no longer needed.
